Actual Cleaning Results

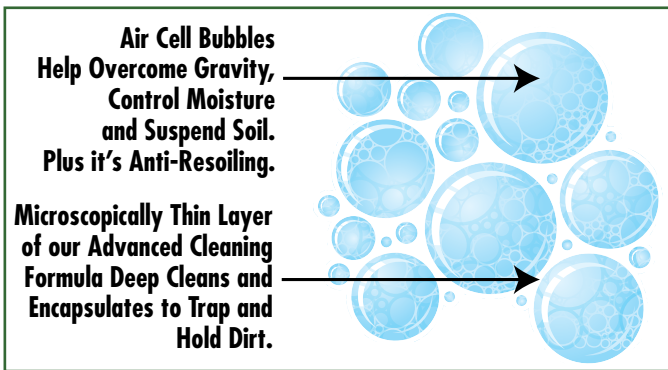

The above carpets were cleaned with the Von Schrader Low Moisture Carpet Air Cell Soil Extraction Cleaning System. It is the most advanced carpet cleaning technology with results that are unmatched. Von Schrader detergents prevent rapid resoiling which will keep your carpets looking cleaner longer.

The Von Schrader Low Moisture Upholstery Air Cell Soil Extraction Cleaning System is state of the art. It has been tested and proven to be in a class of its own. No other upholstery cleaning system comes close to the cleaning capability of deep cleaning without over wetting. It cleans all types of fabrics including leather.

How Air Cells work for you.

Our cleaning process uses gentle, biodegradable, nontoxic, and fragrance-free cleaning agents that leave no sticky or oily residue to attract and hold soil.

What is the difference between Air Cell Extraction and Regular Wet Extraction?

Wetness Comparison

Each photo shows what happens when air cells or liquid are applied to paper napkins by two different methods of extraction cleaning.

30 seconds elapsed time

Air Cell Controlled

Liquid Loss of Control

Air Cell Extraction™ technology uses thousands of tiny Air Cell Cleaning Bubbles which are 90% air and only 10% moisture, not gallons of water like wet extraction. Notice the limited wetting and migration of Air Cells on the left compared to an equal volume of competitive solution on the right. Air cells control the cleaning process and problems associated with over wetting carpet.

Other Benefits

- Factory trained professional technicians.
- Carpet and upholstery fabrics are brighter, softer and cleaner.
- Drier right after cleaning.
- No bad odors.
- No shrinking or mildew.
- Won't soak upholstered seats.
- Green cleaning that really works.
- Von Schrader Certified Advanced Air Cell Formula Cleaners guarantee the highest quality and outstanding performance.
- Safe, (Boeing Aircraft approved) engineered and tested to give you the most successful and efficient cleaning results.
- Customers come first.

Safe for People, Carpet and the Environment.
